will be stored in their suspended position in the main hangar whilst this is done.

New Hangar Talk Dominates Executive Meeting

The need for the club to invest in more hangaring space has been brought into the spotlight of late, as a result of the club's latest addition to it's fleet, the Puchatek, not fitting into any existing hangar. Various proposals are being considered at the present time, including extending the current main hangar and/or erecting a new hangar situated where the trailers are now kept. The researchers are due to report back to the executive at the next executive meeting. Until a permanent solution is agreed on, a temporary nose cover for the Puchatek will be made to extend from the T-hangar where the aircraft is currently stored. ✈

Contact Person Answering Machine

The contact person, Justine Thompson, now has a telephone answering machine. If it is on when you call, don't be afraid or intimidated; it is only a machine.
Clearly state your name, contact phone numbers, which days you intend to fly, and if you need to be picked up at the university footbridge.
It is in your interests to call *on or before* Thursday evening, not on Friday, as Justine offers no guarantee that she will hear the message after the designated ringing time of 8:00 -10:00 pm Thursday.
